Pencil Sharpeners – Please Note Product Codes

Prior to Nauticalia's acquisition of SDL Imports, both companies had established ranges of die-cast metal pencil sharpeners which were, in some cases, identical but with different product codes. We have now settled on only one product code for each design. This means you may find the code stored in your purchasing system is discontinued, but the item is still available under a different code. Please order using the codes below and update your records.
