Ships' Wheels

Our acacia hardwood ships' wheels are made in the time-honoured way, from arc-shaped sections of wood laid up in overlaps around turned spokes to form a circle and set in a central brass casting. Please note these wheels are decorative, and not intended for steering a boat. Measurements are spoke tip to tip.

7133 Ship's Wheel, 40cm (16 inch).
7130 Ship's Wheel, 60cm (24 inch).
7129 Ship's Wheel, 90cm (36 inch).

Pewter Porthole Mirrors

The chunky aluminium porthole frames on these mirrors have a pewter colour coating which is less polished than our brass and chrome ones for an authentic, and slightly aged, look. The openings are operational, so could be used as cupboard doors or hatches for example.

***Clearance!* 4352 Aluminium Porthole Mirror, dark pewter, 38cm.**

***Clearance!* 4353 Aluminium Porthole Mirror, dark pewter, 30cm.**

Ship's Telegraph

Modelled on the standard twin-lever engine order telegraph – once the primary means of communication between a large vessel's bridge and engine room – this scaled-down replica is cast in solid brass throughout and includes an internal bell. 35cm tall, face diameter 13cm.

7141 Ship's Telegraph, 35cm tall.

Brass Spitfire on Stand

Churchill's famous tribute to RAF Fighter Command is inscribed on the plaque - the finishing touch to this emotive piece of sculpture. Cast in solid brass and heavily burnished by hand, it celebrates the genius of the Spitfire's designer, RJ Mitchell. Even today the sight of one of the few remaining 'Spits' soaring into and swooping out of the blue quickens the pulse and swells the heart. Capturing and preserving some of that magic is what this magnificent model is all about. Wingspan 23cm, overall height 18cm.

4599 Brass Spitfire on Wooden Stand, 18cm.

The Whistle that Helped Titanic's First Mate Save 700 Lives!

Authentic replica of the whistle used by *Titanic*'s First Mate, as used so dramatically in the 1997 film, by Kate Winslet, to call her rescuers. British-made by Acme, who supplied the White Star Line in 1912, using the original tooling. Certificate of authenticity included.

1912 RMS Titanic Whistle.
