Concorde

The dream of a future where people would travel the world at twice the speed of sound became a reality when Concorde made her first test flight on 2 March 1969, and 'went supersonic' on 1 October the same year. She then entered service with British Airways and Air France in 1976 and took her final commercial flight on 24 October 2003, having completed more than 50,000 flights.

Avro Vulcan

The enormous delta-winged Avro Vulcan was designed as the mainstay of the V-bomber fleet - our Cold War nuclear deterrent. However, its finest hour was arguably the audacious long-range 'Black Buck' raids of the Falklands conflict. The Vulcan served from 1956 until October 2015, when the last example (XH558) was withdrawn from service and restored to become a much-loved highlight of air shows and displays. Instantly recognisable, seeing (and hearing!) one in flight was an experience not to be forgotten. Sadly, even XH558 no longer flies - the task of keeping her in an airworthy condition proving insurmountable.
