

Exhaust systems

Gas / water separator

For marine engines and generator sets

The VETUS gas / water separator has a double function. It separates the injected raw cooling water from the exhaust gases and also functions as a gooseneck. Particularly important for generator sets, the separator reduces the exhaust noise and drains the cooling water below the waterline, thus preventing the characteristic splashing sound.

Type LGS 40/45/50/60/75/90

Specifications

- 360° Rotating hose connections for 40, 45 or 50, 60, 75 or 90 mm internal hose diameters
- Cooling water drain of 38 mm, 50 mm or 75 mm
- All models come with a stainless steel (AISI 316) mounting strap or a stainless steel (AISI 316) mounting bracket with synthetic straps
