

Accessories for cowl ventilators

Dorade box type BOX and BOXS

Prevents water from entering the ventilator

This box drains off any water entering the interior of the boat from the cowl ventilator and can be closed off entirely by means of the incorporated stainless steel (AISI 316) mushroom ventilator. Available in synthetic material or stainless steel (AISI 316), maximum deck thickness 25 mm. Choose the same size BOX as the diameter (B) of the cowl ventilator.

CE marking: Area AII (for information regarding the location area, see page 306).

Dorade box type DJBOX, TBOX and YBOX

Synthetic boxes

This synthetic box drains off any water entering the ventilator and can be closed off entirely by means of the incorporated stainless steel (AISI 316) mushroom ventilator. The screw down deck ring supplied with the cowl ventilator can be easily fitted to the dorade box using the supplied nuts and bolts.

Note: These boxes are not suitable for cowl ventilator type S.
